The EFX 5.31 Elliptical

Our 5.31 home elliptical offers a dynamic lower-body workout with CrossRamp[®] technology for variable incline and stride length. A variety of programs let you tailor your workout and track your progress. Every aspect of the machine and console was designed to offer comfort and convenience as you pursue your fitness goals.

1 Adjustable CrossRamp[®] targets key muscle groups.

The ramp angle is adjustable from 15 to 30 degrees, allowing you to individually target and work all major lower body muscle groups. Variable stride length, from 21 to 23 inches, offers even greater diversity to your workout.

2 Multi-grip handlebars offer greater comfort.

Stationary handrails provide multiple arm and hand positions to ensure comfortable posture and proper technique during every workout.

3 Designed with your home in mind.

With subtle tones and clean lines, the 5.31 elliptical is designed to fit naturally with your home décor and your lifestyle. The display keeps your favorite things close at hand with areas for your water bottle, mp3 player and cell phone. A compartment on the front of the machine keeps your magazines in easy reach.

4 Intuitive console is easy to read and adjust.

Access QuickStart[™] programs and User IDs at the touch of a button. "Quick keys" offer easy access to speed and incline adjustment – to help you get the most from your workout.
