ICARIAN LINE

# Modulars & Multi-Stations

Your workout, defined by you.  
Engineered to move the way you move.

### The Precor strength line.

The Precor strength line is designed with the same beauty, artistic vision and attention to detail you've come to expect from the cardio leader. Durable and easy to use, the complete line is, like all Precor equipment, smooth and fluid, based on the motion of the human body. It's engineered to move the way you move, to work the way you work, providing a better, more positive exercise experience.

### Modulars & Multi-Stations

Versatile. Expandable. Always impressive. This is the Swiss army knife of fitness equipment. Precor Modulars and Multi-Station machines are designed to offer the maximum fitness options in the minimum of space. These units are space-efficient for the number of exercise stations they incorporate, and the Modulars are customizable to fit any facility or need. The exercise movements on the machines are identical to single station units without ever compromising the function users have come to expect.
